

Technical Decisions Log

#	Decision	Alternatives considered	Rationale
1	Domain: European AI ethics	Payroll, clinical data, ML interview prep	Public value; rich official documentation; personally motivated
2	4 documents (~170 pages)	Minimum 3 docs / 20 pages	Depth: law + technical + principles + case studies
3	chunk_size=1000, overlap=150	500/50, 2000/200	Legal provisions need larger coherent chunks; verified via retrieval tests
4	TOP_K=4	2, 8	4 gives multi-source context without noise
5	temperature=0.2	0.0, 0.7	Factual domain → low creativity; not 0 to keep fluent phrasing
6	MemorySaver checkpointer	Manual history list	Native LangGraph pattern; thread-scoped; less code
7	"I don't know" rule in system prompt	Let model answer freely	Prevents hallucinated legal claims — core responsible-AI choice
